COMPANY

Początki firmy sięgają lat 70-tych. Wówczas Ostróda była już znaczącym w Polsce ośrodkiem produkcji laminatu LPS, zaś właściciele firmy MAZURY Sp. z o.o. stykali się bezpośrednio z technologią laminowania zarówno zawodowo jak i hobbystycznie - przy okazji żeglarskich wypraw. Od 1988 roku właściciele ciągle doskonalą swoje umiejętności produkcyjne i menedżerskie, zaś firma przeszła całą drogę rozwoju począwszy od jednej hali i czterech pracowników do obecnych 2 hektarów powierzchni zakładu (w tym 0,6 hektara powierzchni hal produkcyjnych i montażowych) oraz 100 osób załogi. W roku 1991 powołali do życia firmę SKARKO SC w Ostródzie, która produkowała formy i gotowe elementy dla przemysłu samochodowego w Niemczech, potem również łódzie i obudowy generatorów prądowców. Następne lata to ciągłe doskonalenie umiejętności i technologii LPS, aż do zakupu obiektów przy ulicy Przemysłowej w Ostródzie w roku 2001. Po dokonaniu niezbędnych inwestycji oraz prac modernizacyjnych, firma zaczęła specjalizować się w produkcji łodzi motorowych, zdobywając z każdym rokiem nowe, szersze rynki zbytu. Każdy rok to dynamiczny rozwój produkcji. Firma promuje własne łódzie a nasi partnerzy sprzedają łódzie "Mazury" niemal w całej Europie, m.in. w Norwegii, Szwecji, Danii, Niemczech, Holandii, Francji, Hiszpanii i Wielkiej Brytanii. Współpracujemy również z takimi markami jak Modesty, Seamaster, Gozzi, Venus. Produujemy własne projekty, ale także pracujemy na powierzonych formach. Nasza oferta jest bardzo szeroka. Specjalizujemy się w produkcji łodzi, ale także produkujemy wszelkie produkty z laminatu LPS w dowolnym kształcie, wielkości i kolorze. Między innymi produkujemy obudowy siłowni wiatrowych, meble, oddziały bankowe, osłony oraz zabudowy maszyn i urządzeń, wyroby sanitarne, umywalki, wanny, brodziki, nietypowe zbiorniki i pojemniki, elementy karoseryjne i wiele innych. Produujemy również wszelkie wyroby metalowe ze stali nierdzewnej i stali czarnych- w tym relingi, zbiorniki paliwowe, łodziowe, balustrady itp. Firma dysponuje prototypownią, w której wykonujemy wszelkie modele i formy z dokumentacji lub wzorca. Jest również w stanie współtworzyć od projektu nowe konstrukcje.

The origins of the company date back to the 70's . At that time Ostróda was already an important Polish center of manufacturing laminate GRP, and the owners of Mazury Sp.zo.o. have come across with the laminating technology both professionally and as a hobby – on the occasion of sailing expeditions . Since 1988, the owners are continually improving their executive and manufacturing skills. The company has passed all the developing way from the one manufacturing hall and four employees to the existing area of 2 hectares (including 0.6 hectare area of manufacturing and assembly shops), and 100 employees. In 1991 they decided to establish a company SKARKO SC in Ostróda , which has produced the moulds and ready parts for German automotive industry and also the boats and the wind-nacelles. For following years the owners have been developing the skills in GRP technology and they have purchased buildings on Przemysłowa Street in Ostróda in 2001. After making the necessary investments and modernization works , the company began to specialize in the production of motor boats , entering new, wider markets every year. Each year the production is increasing dynamically. The company promotes its own boats , and their partners are selling boats "Mazury" in whole Europe , including Norway, Sweden , Denmark, Germany, Holland, France, Spain and the UK. We also work with brands such as Modesty , Seamaster , Gozzi , Venus . , but also we, but also we, size and color (like wind turbines, furniture, bank branches, ovens and building machinery and equipment, sanitary ware, washbasins, bathtubs , shower trays , unusual tanks and containers and many others). We also manufacture all metal products made of stainless steel and black steel - including rails , fuel tanks , small-scale , railings , etc. The company has a prototyping facilities where we make models and molds or pattern. We are also able to co-create the design of new constructions .

LPS

Wyroby produkowane przez firmę Mazury Sp.zo.o. są wykonane metodą kontaktową na bazie form z wierzchnią warstwą żelkotu. Kolor żelkotu jest ustalany według norm RAL, Reichhold, Ashland, Cryvalley. Wykorzystujemy technolgie laminowania ręcznego, infuzji próżniowej, RTM. Paleta możliwości wytwórczych obejmuje produkcję wyrobów na podstawie dokumentacji technicznej lub wzorów dostarczonych przez klienta, tj. budowa modelu, formy, prototypu, aż do produkcji seryjnej. Specjalizujemy się w produkcji LPS niezależnie od wielkości oraz kształtu powierzonych nam projektu.

The products manufactured by our company are made by contact type of method with the top layer of gel coat. Gel coat's color is determined by RAL standards , Reichhold , Ashland, Cray Valley . We use different techniques of manual laminating , vacuum infusion and RTM. Various options of manufacturing capabilities include the production of goods based of the technical documentation and designs provided by the client, i.e. constructing the model, mold, prototype , to finally production. We pursue in the production of GRP, regardless of the size and shape of the project handed over us .

BOATS

Mazury Sp. z o.o. jest producentem wyrobów z laminatu poliestrowo-szklanego LPS, wykorzystującym wszelkie technolgie (laminowanie ręczne infuzję próżniową, RTM). W naszej ofercie produkcyjnej znajdują się zarówno wyroby wysoko przetworzone jak również wyroby przemysłowe.

Posiadamy dział metalowy, w którym produkujemy wyroby ze stali nierdzewnej. Łodzie MAZURY wyposażone są w okucia zaprojektowane i wykonane przez naszą wykwalifikowaną kadrę. Jesteśmy w stanie wytworzyć nietypowe okucia lub profile również na Państwa zlecenie. Mamy wieloletnie doświadczenie w zakresie budowy prototypów i modeli z laminatu poliestrowo-szklanego. Stworzyliśmy wiele nowych produktów począwszy od szkicu. Znajdziecie Państwo wśród nich łodzie motorowe takie jak Mazury 500, Mazury 560 jak i projekty: Mazury 670 Sport, Mazury 700CC. Poza łodziami wyprodukowaliśmy modele i formy specjalistycznych nadwozi samochodowych oraz standów bankowych. Zajmujemy się także modernizacją, przebudową i regeneracją istniejących już form. Służymy Państwu fachowym doradztwem w tym zakresie.

Oferta wyrobów wysoko przetworzonych, to przede wszystkim jachty oraz łodzie motorowe do 12m długości.

Wyroby przemysłowe to obudowy siłowni wiatrowych, stoiska handlowe, wszelkiego rodzaju pojemniki, osłony, obudowy, pokrywy oraz inne wyroby. Wyroby z laminatu poliestrowo-szklanego charakteryzują się dużą odpornością na procesy starzenia się, wynikające z wpływów atmosferycznych i środowiskowych.

Nasza firma służy doradztwem w zakresie technologii wykonania, zajmuje się budową form w oparciu o dokumentację lub powierzone modele.

Na nasz dotychczasowy sukces wyrażony zadowoleniem klientów oraz rosnącą sprzedażą - głównie eksportową - mają wpływ następujące czynniki:

- wysoka jakość oferowanych produktów
- rozsądna i stabilna cena wyrobów
- dbałość o klienta, terminowość dostaw
- elastyczność działania.

Mazury Sp. z o.o. Company is a producer of glass-reinforced polyester (GRP) where are used all technologies (hand lamination, infusion vacuum RTM). We offer both highly processed products as well as industrial products.

We have got a metal workshop where is produced stainless steel products. MAZURY boats are equipped with fittings designed and manufactured by our qualified staff. We are capable to make untypical fittings and profiles also on your request. Our company has got a lot of years of experience in the constructing of prototypes and models of GRP. We created a lot of new products starting from the draft. There are among them motor boats, such as Mazury 500, Mazury 560 and projects: Mazury 670 Sport, Mazury 700cc. Except the boats we have produced models and forms of cars, body and the bank stands. We also deal with modernization, reconstruction and regeneration of the existing forms. We provide professional advice in this matter.

Our offer of highly processed products includes yachts and motor boats up to 12 metres long. Our industrial products consist of: case of wind-nacelles, trade stands, all kinds of containers, covers, cases and many more ones.

The products made of glass-reinforced polyester are characterized by high resistance of aging processes, resulting from weathering and environmental impacts influences.

Our company advises on technology implementation, deals with the construction of forms based on documentation and entrusted models.

Our current success and customers' satisfaction expressed by growing sales (mainly export) is the result of the following factors:

- High quality products
- reasonable and stable prices of our products
- excellent customer service,
- on time delivery
- flexibility.

METAL DEPARTMENT

Mazury Sp.zo.o jest w Polsce liczącą się na rynku firmą.. Zdobyte doświadczenie w produkcji łodzi motorowych pozwoliło na poszerzenie oferty firmy o wykonywanie okuć ze stali nierdzewnej.

Produkujemy wyroby wysokiej jakości, zgodnie z najnowszymi światowymi trendami przy realnie korzystnych cenach. Dzięki rozbudowanemu parkowi maszynowemu i doświadczonej kadrze, jesteśmy w stanie wykonać wszelkie zamówienia. Wykonujemy: kosze dziobowe, kosze rufowe, rumple, drabinki, podpory masztu, zakończenia odbojnic, różnego rodzaju knagi, ramy owiewek, polery, relingi, okucia masztów, zbiorniki wodne i paliwowe (z odpowiednim certyfikatem), balustrady, poręcze, zawiasy.

Wykonujemy wyroby ze stali nierdzewnych i czarnych, także szlachetnych.

Mazury Sp.zo.o. is the significant company on polish market. The experience gained in the production of motor boats allowed to extend the company's offer of performing fittings of stainless steel.

We produce high quality products, according to the latest global trends for a good price. Thanks to the large workshop and experienced staff, we are able to make any order. We offer: bow baskets, stern baskets, rumples, ladders, the mast supports, the end fenders, different types of cleats, fairings frames, bollards, railings, fittings masts, water and fuel tanks (with appropriate certificate), balustrades, handrails, hinges. We produce the products of stainless and black steel.

MAZURY

PROTOTYPE

Posiadamy wieloletnie doświadczenie w zakresie budowy prototypów i modeli z laminatu poliestrowo-szklanego. Stworzyliśmy wiele nowych produktów począwszy od szkicu. Znajdziecie Państwo wśród nich łodzie motorowe, takie jak Mazury 500, Mazury 670 Sport, Mazury 700CC, czy też nowe konstrukcje takie jak: Mazury 520, Mazury 570, Mazury 610 i wiele innych. Poza łodziami wyprodukowaliśmy modele i formy obudów siłowni wiatrowych, specjalistycznych nadwozi samochodowych oraz standów bankowych i mebli. Zajmujemy się także modernizacją, przebudową i regeneracją istniejących już form. Na rok 2013 przygotowaliśmy kilka nowych projektów, które można obejrzeć w naszej ofercie.

We have got experience in the constructing the prototypes and models of glass-reinforced polyester . We have created and manufactured a lot of new products starting from a draft. Our customers can find in our offer motor boats, such as Mazury 500 , Mazury 670 Sport , Mazury 700CC and new products such as Mazury 520, Mazury 570, Mazury 610 and many others. MAZURY

The origins of the company date back to the 70's. At that time Ostróda was already an important Polish center of manufacturing laminate GRP, and the owners of Mazury Sp.zo.o. have come across with the laminating technology both professionally and as a hobby – on the occasion of sailing expeditions. Since 1988, the owners are continually improving their executive and manufacturing skills. The company has passed all the developing way from the one manufacturing hall and four employees to the existing area of 2 hectares (including 0.6 hectare area of manufacturing and mouting rooms), and 100 employees. In 1991 they decided to establish a company SKARKO partnership in Ostróda, which has produced the moulds and ready parts for German automotive industry and also the boats and the wind-powerplants covers. For following years the owners have been developing the skills in GRP technology and they have purchased buildings on Przemysolwa Street in Ostróda in 2001. After making the necessary investments and modernization works, the company began to specialize in the production of motor boats, entering new, wider markets every year. Each year the production increases dynamically. The company promotes its own boats, and its partners are selling boats "Mazury" in whole Europe, including Norway, Sweden, Denmark, Germany, Holland, France, Spain and the UK. We also work with brands such as Modesty, Seamaster, Gozzi, Venus, but also we, but also we GRP, size and color (like wind turbines, furniture, bank stands, covers and building machinery and equipment, sanitary ware, washbasins, bathtubs, shower trays, unusual tanks and containers and many others). We also manufacture all metal products made of stainless steel and black steel - including rails, fuel tanks, small-scale, railings, etc. The company has a prototyping facilities where we make models and molds or pattern. We are also able to co-create the design of new constructions.

Selskapet startet opp i 1970 rene. Allerede på den tiden var Ostroda et viktig senter for grp-produksjon. Eierne av Mazury Sp.zo.o var opplært i grp produksjon både profesjonelt og i forbindelse med deres interesse for seiling / seil ekspedisjoner med egenproduserte båter. Fra 1988 har det foregått en kontinuerlig utvikling i produksjon og drift. Selskapet har gjennomgått en utvikling fra en produksjonsbygning med fire ansatte til dagens 20 mål store anlegg med 100 ansatte. I 1991 ble det besluttet å stifte et selskap SKARKO i Ostroda, som produserer former og produkter for tysk bilindustri, båtformer og – modeller samt vindmølle generator hus. I de påfølgende årene utviklet eierne kunnskap innen grp produksjon og teknologi. I 2001 kjøpte de bygningene i Przemyslowa vei hvor dagens fabrikk holder til. Etter at de nødvendige investeringene og moderniseringene var gjort, startet spesialiseringen innen motorbåtproduksjon samtidig som man etablerte seg i nye, større markeder hvert år. Produksjonen har økt dynamisk hvert år. Selskapet markedsfører egne modeller samt at deres forhandlere selger båtene i hele Europa; Norge, Sverige, Danmark, Tyskland, Nederland, Frankrike, Spania, og Storbritannia. Vi produserer også modeller for merker som Modesty, Seamaster, Gozzi og Venus. Vårt tilbud er svært allsidig og bredt. Vi har egen produksjon av alt innen både rust-/syrefast stål og vanlig stål. Produktene er bl.a. håndrekker i forskjellig utførelse, drivstoff-, vann og septikk tanker o.s.v. Selskapet har i eget hus fasiliteter og kunnskap for produksjon av pluggformer. Her kan vi også utvikle produkter i samarbeid med eksterne kunder i f.m. nye konstruksjoner o.l.
